Argraph Debuts MemoryKick Si Offering the Fastest Backup and Cutting-Edge Features In a Pocket-Size, Lightweight Device

Carlstadt, New Jersey;

Argraph Corporation, the international supplier of photographic / imaging products, and **MemoryKick**, a leading manufacturer of portable multimedia solutions jointly announce the **MemoryKick Si™**, the ideal solution for your digital life, which will transport the way we See, Share and Store photos, videos and music to the next level.

The **MemoryKick Si** is the most advanced Photo Backup, Photo Viewer, Video Player, MP3 Player, Card Reader, and complete Portable Data Backup Solution available, all in one compact, stylish device. The MemoryKick Si is available in capacities of 160, 320, and 500GB.

The **MemoryKick Si** offers the fastest transfer speeds on the market. It can transfer any type of files (photos, videos, music, data, etc.) from memory cards, at blazing fast speeds up to **40MB/s** utilizing its proprietary Direct Access File Management System (**DA-FMS**) technology, enabling it to transfer as much as **2.22 gigabytes per minute**.

As many as three memory cards and one USB device can be connected simultaneously to the **MemoryKick Si**. You can easily transfer both to and from the **MemoryKick Si**, and virtually all of the memory cards and USB flash drives used today. You can also transfer directly from memory card to memory card, USB device, or computer hard drive.

The **MemoryKick Si's** 3.5" VGA LCD color screen is ideal for vivid, detailed viewing of photos and videos. The built-in G-sensor automatically orients images for horizontal and vertical viewing. With its ability to zoom in and out, create and display slideshows, and view RAW photos and EXIF information, the **MemoryKick Si** will be every photographer's indispensable digital assistant.

"The **MemoryKick Si** is a major advance in portable media centers. It provides the best functions of a Photo Bank (Epson, Hyperdrive, etc.), at a significantly lower price per megabyte. It features a large high-quality viewing screen with auto-orientation, zooming, and intuitive navigation," explained Mark Roth, CEO of Argraph. "On top of that, the **MemoryKick Si** also boasts the best capabilities of an MP3 player, Memory Card Reader, Video Player, and even a Laptop by enabling you to create folders, copy, paste, and move images and rename them, all in one pocket-size, lightweight device. Nothing else comes close."

"Large storage capacity, the fastest transfer speed available, reliability, multimedia functionality, and the ability to share quickly is what the **MemoryKick Si** is all about" added Anthony Cole Link, CEO of NionCom. "It is an essential necessity of digital life".

The **MemoryKick Si** enables you to:

SEE Photos and Videos on a 3.5" VGA LCD Color screen. Zoom in and out on your photos. View RAW photos with the RAW image decoder / viewer. The Auto Orientation G-sensor automatically adjusts for vertical and horizontal viewing. View all of your photos in the gallery thumbnails; create and view personalized slideshows of your photos.

SHARE Photos, Videos, Music, and any other files by transferring them from the MemoryKick Si to attached thumb drives or memory cards. Use the MemoryKick Si as a "media sharing center" transferring files between any attached memory cards or USB

storage devices. The **MemoryKick Si** accommodates up to four memory cards / devices simultaneously – CF, USB device, Memory Stick, plus another memory card.

STORE Photos on the **MemoryKick Si** high capacity 160, 320, or 500GB SATA Hard Drive. Backup your photos quickly and securely in the field.

PLAY your favorite music and videos and listen with the included earphones, the built-in speaker or on your home audio system. Connect to an LCD flat panel monitor or television to view photos and watch videos.
