SIRUI G-X, C-X, K-X & L SERIES PROFESSIONAL BALL HEADS

BALL HEADS

Superior performance at
an unbeatable price.

G-X SERIES BALLHEAD

**G-10X
Ball Head**

1. Separate adjustment knobs for panning, friction control and locking for maximum control and flexibility.
2. The **G-10X/20X** have two bubble levels (one on top and one on the clamp locking knob) for fast horizontal and vertical alignment.
3. Sirui's unique locking mechanism provides unequalled locking force even with **loads up to 44lb (20kg)!**

**C-10X
Ballhead**

**L-10
Monopod
Tilt Head**

WHY SIRUI BALLHEADS?

Each assembled component of SIRUI Ball Heads is produced by CAM (Computer Aided Manufacturing) - **the ultimate in precision manufacturing techniques.**

SIRUI ball heads are made of **aviation quality aluminum alloy 7075-T6 and 6067-T6** for long life and maximum strength.

SIRUI uses a special manufacturing technique that produces the support ball with tolerances to within 0.01mm of a perfect sphere. This uncompromising precision guarantees **superior performance and smooth operation** for any type of 35mm DLSR or medium format camera system.

The interior locking system in SIRUI Ball Heads uses SIRUI designed **double bevel locks for outstanding locking performance and reliability.** Most ball heads only use a single, less efficient interior locking system.

The panning base is designed with a 360° dial. Having a **separate panning base lock knob** provides greater accuracy for panning and panoramic shooting.

The **patented safety lock design**, and SIRUI quick release plates, effectively prevent the camera from accidentally sliding off of the ball head. And most quick release plates can be used on SIRUI Ball Heads
(Note: safety lock design not available from other brands).

The **custom anodized surface treatment** makes all metal surfaces highly resistant to abrasions and produces a beautiful appearance.

All Sirui Ball Heads are Arca-Compatible

K-X SERIES BALLHEAD

1. Separate control knobs for panning and locking. Friction knob is conveniently located on the main locking knob.

2. Triple bubble levels allow precise horizontal leveling for critical shooting situations.

3. Sirui's unique locking mechanism provides unequalled locking force even with loads up to 77lb (35kg)!
