Argraph's Marumi Digital High Grade (DHG) Achromat Macro Lenses Offer Macro for All!

Argraph Corporation, the international supplier of photographic / imaging products is introducing **Marumi Digital High Grade (DHG) Achromat Macro Lenses**, the new technological breakthrough from Marumi, ideal for macro photography. If your lens does not have a macro mode, Achromat will provide it. For those that already have a macro mode, Achromat will increase and enhance it, allowing for even greater magnification.

This breakthrough technology developed by Marumi makes **DHG Achromat** filters ideal for macro photography. **Achromat Macro** filters are designed to shorten the focal length of your lens and to enhance its macro mode capabilities with outstanding clarity. Other filters can provide simple magnification. Only **Marumi Digital High Grade (DHG) Achromat Macro** filters provide the full-frame sharpness, detail, and clarity that professionals demand.

Marumi Digital High Grade (DHG) Achromat Macro Lenses are available in 2 grades: 330(+3) and 200(+5). Both produce outstanding edge-to-edge clarity that is unsurpassed by any other filter product.

These filters are manufactured to the highest standard and feature ultra low reflection coating. The **Marumi (DHG) Achromat Macro** lens is mounted in specially designed rings that feature a low reflection and satin like finish. They are specifically designed to be the thinnest possible, while maintaining strength and functionality. This allows for the widest possible focus length.

Marumi (DHG) Achromat Macro lenses are the highest-grade ancillary lenses on the market today. Made by the world's premier filter manufacturer, Marumi Optical Company of Japan, these filters are a worthy complement to today's most advanced lenses.

Argraph Corporation and its subsidiaries has been a leading supplier of photographic imaging products since 1953. Headquartered in Carlstadt, NJ, Argraph offers an efficient distribution network featuring immediate delivery of over 7,000 products to retailers across the country, and around the world. Additional information is available at www.argraph.com.

Samples are available to qualified reporters and editors upon request.
