CES 2014 LVH Booth # 46020

SIRUI's Revolutionary New Multi-Function Monopods Are Perfect For Photo & Video

SIRUI Revolutionary New P-S Series Photo/Video Monopods have three **sturdy fold-down support feet** that provide stability and flexibility not possible with conventional monopods. The rugged feet allow you to **pan the monopod 360° and tilt 20°** in any direction without worrying that the monopod will move out of position. And you can step on the feet for even greater stability.

The SIRUI designed and patented 360° panning hand grip produces smooth, pro-level panning effects. Its foam padded for a **comfortable feel and secure hold in cold or wet conditions**. If you don't need the panning function, simply tighten the locking collar.

To allow tilting of the monopod 20° in any direction, SIRUI utilizes a precision ball-and-socket mechanism in the base of the monopod. Control the amount of drag that you need by turning the tension control knob. To restrict movement (no tilting) twist the vertical locking collar and turn it into a monopod with support feet *.

The support feet can fold flush and lock into position against the monopod leg. The large rubber foot lets you work on slippery surfaces and can be replaced with a stainless steel spike for use outdoors.

If you don't need the feet, you can easily unscrew them and convert the SIRUI P-S Photo/Video Monopod into a conventional monopod. And for added flexibility, **the feet can be used as a table-top or low angle tripod!**

SIRUI P-S Series Photo/video monopods are equally at home with photo and video equipment. And if you need to get your equipment up high or want an unusual perspective, you can, thanks to the lightweight design. For fast connect/disconnect, you can add the SIRUI MP-20 Photo or VH-90 Video Quick Release Platforms.

Features:

1. Three sturdy fold-down support feet that provide additional stability and flexibility. Removable for use as a standard monopod.
2. Patented panning grip smoothly rotates 360°.
3. Precision ball head in base allows tilting 20° in all directions.
4. Adjustable friction control on the ball head lets you adjust tension for different weight equipment and resistance requirements
5. Patented base locking collar keeps the monopod standing upright.
6. Removable feet can be used as a table top tripod.
7. Foam grip for solid hold in wet or cold conditions.
8. Mounting plate comes with double headed, reversible screw that accommodates 1/4" and 3/8" tripod sockets.
9. Rubber foot for use on wooden, stone surfaces. Replace with spike for use outdoors in grass and dirt.
10. Lightweight 8 layer 100% Carbon Fiber for added strength, increased load capacity and vibration reduction. (P224S, 324S & 424S)

* Not designed for use as a free-standing support.

Sirui Tripods are distributed in the U.S exclusively by **Argraph Corporation** and are available from retailers nationwide. As with all Sirui products, the new **P-S Series Monopods** come with a 6-year warranty.

About Argraph:

Argraph Corporation and its subsidiaries are leading manufacturers and distributors of photographic and imaging products since 1953. Headquartered in Carlstadt, NJ, Argraph offers unique and innovative products through retailers across the country, and around the world.

Additional information is available at www.argraph.com.

About Sirui:

SIRUI Photographic Equipment Industry Co., Ltd, founded in 2001, has quickly become one of the leading manufacturers of photographic equipment. Located in Zhongshan, in the southern part of the Pearl River Delta, they specialize in the manufacture of professional tripods, monopods, ball heads and related accessories. By continuously investing in advanced tooling, innovative technologies and precision machinery - in concert with a highly trained design and engineering team - SIRUI is able to produce high quality products from design concept to parts manufacture to final assembly.
